M.D., D.D.S., DR. MED. H.C. MULT., DR. SC. H.C. MULT., FDSRCS (ENGL.), FRCS (EDINB.)

Professor Dr. Dr. Hermann F. Sailer is regarded as one of the outstanding pioneers of oral and maxillofacial surgery of our time. His professional career began after completing dual studies in medicine and dentistry at the University of Erlangen. From early on, his drive to push the boundaries of surgery became evident: stations in Würzburg, Zurich, London, and Boston shaped his medical foundation. As early as 1987, he was appointed Full Professor and Medical Director of the Department of Oral and Maxillofacial Surgery at the University of Zurich – a position he held until 2001, before founding the Prof. Sailer Clinic in Zurich, establishing an internationally renowned institution for advanced medicine.

However, his impact extended far beyond the clinic. As founder, co-founder, and president of numerous professional societies – including the International Cleft Lip and Palate Foundation and the Swiss Society for Oral Laser Medicine – he set worldwide standards in science and practice. His expertise was further recognized through memberships in esteemed institutions such as the German National Academy of Sciences Leopoldina and the Royal Colleges of Surgeons in England and Edinburgh.

Particularly noteworthy is his humanitarian commitment. With the establishment of the Cleft-Children International CCI Foundation and the Cleft-Kinder-Hilfe Professor Hermann Sailer Foundation, he initiated worldwide aid projects for children with cleft lip and palate. Under his leadership, cleft centers were established in India, Nepal, and Pakistan, where more than 110,000 treatments have been carried out to date – an invaluable contribution that has profoundly transformed the lives of countless children and families.

The international recognition of his work is reflected in numerous honorary doctorates – from universities in Athens, Nepal, Chennai, Timișoara, and Mangalore – as well as prestigious awards such as the Lifetime Achievement Award in Medicine (2021), the Humanitarian Award of the International Cleft Lip and Palate Foundation (2012), and the European CEO Award for Best Private Healthcare Provider (2014). In addition, in 2020 a chair was even established in his name – the Professor Hermann Sailer Chair of Facial Cleft & Craniofacial Surgery – at the state KIMSDU University in India.

With more than 247 scientific publications, he has shaped not only surgical practice but also academic discourse. Honorary memberships in numerous international professional societies underline the global impact of his work.

Professor Hermann F. Sailer is therefore far more than a successful surgeon: he is a visionary, a bridge-builder between science and humanity, and a physician who has devoted his life to healing and compassion. Today, his name stands for medical excellence, humanitarian commitment, and the unwavering belief that the art of surgery can profoundly and sustainably improve human lives.
